PROFESSIONAL SUMMARY

Data Analyst with hands-on experience using **SQL, Excel, Power BI, and Python** to clean, analyze, and transform data into actionable business insights. Background in **Engineering & Management**, combining strong technical analytics skills with a **business-oriented mindset** to support data-driven decision-making.

SKILLS

- **SQL:** MySQL, SQL querying, Joins, CTEs, Window Functions
- **Python:** Pandas, NumPy, Matplotlib, Seaborn
- **Microsoft Excel:** XLOOKUP, Pivot Tables, Conditional Formatting, Data Cleaning
- **Microsoft Power BI:** Power Query, DAX, Data Modeling, Interactive Dashboards
- **Data Analytics:** Data Cleaning, Data Transformation, KPI Analysis, Business Reporting

PROJECTS

Supply Chain Performance & Logistics Analytics — *SQL, Python, Power BI*

- Built and analyzed a **MySQL supply chain dataset**, applying data cleaning, validation, joins, and transformations.
- Used SQL to analyze **delivery performance, late orders, regional patterns, and delivery risk**.
- Developed interactive Power BI dashboards tracking **Late Delivery Rate, Delivery Risk, and Regional Performance**.
- Identified a **54.82% late-risk rate**, highlighting a significant delivery-performance gap and informing logistics improvement recommendations.

Exploratory Data Analysis with Python — Coursera Guided Project

Python, Pandas, NumPy, Matplotlib, Seaborn.

Data Analysis with SQL: Inform a Business Decision — Coursera Guided Project

SQL, Relational Databases

PROFESSIONAL EXPERIENCE

Financial Risk Analyst Intern — CYGNUS LLC

Tashkent, Uzbekistan | Jun 2026 – Present

- Analyze financial data to identify trends, **abnormalities**, and **risk factors**.
